Open Type formats allows to include an expanded character set and layout features, to provide advanced typographic control and better linguistic support such as ligatures, alternates characters and contextual substitutions.
Open Type fonts work in all applications but only some take profit of the features.

OT supports Unicode which enables the fonts to contain more than 65,000 glyphs, while PostScript area limited to a maximum of only 256 characters.
Open Type fonts work in all platforms and operative systems, having one single file for Mac and PC makes sharing files much more easier.
