Character Sets	Basic Latin Latin-1 Supplement Latin-2 Central European Latin Plus
License Types	Desktop, Webfont, ePub, App, Server

FinalSix is the typographic adaptation of a lettering. Working on the graphic image for a sports event (the European Waterpolo Final in 2014) we had the idea of creating a character set that reflected the idea of the undulating movement of water in a pool. In practice, we draw characters with rounded tops, bottoms and diagonals and using the word **WATERPOLO** as a visual reference for a wavy feeling, in a process that we could define as “form follows meaning.”

To preserve its personality as much as possible, the most idiosyncratic characters are found in the Default set, while we can find more standardized variations for editorial use in a Stylistic set.

Open Type formats allows to include an expanded character set and layout features, to provide advanced typographic control and better linguistic support such as ligatures, alternates characters and contextual substitutions.  
Open Type fonts work in all applications but only some take profit of the features.

OT supports Unicode which enables the fonts to contain more than 65,000 glyphs, while PostScript area limited to a maximum of only 256 characters.  
Open Type fonts work in all platforms and operative systems, having one single file for Mac and PC makes sharing files much more easier.
